

IMP Flame Cutting Machines

The IMP flame cutting machine represents the latest development in portable machine technology descending from a long line of tried and trusted predecessors. The IMP incorporates a great many user benefits not usually available on this class of machine and can operate on a variety of gas types such as acetylene, propane and natural gas.

The machine lends itself to multiple blowpipe operation and has a capacity to cut 150mm plate as standard. Infinitely variable speed control and free running clutch extend its range of applications. The IMP is highly portable being light, well balanced and easy to carry and position. Whether on track or free standing, the inherent stability of design guarantees smooth, accurate cuts across the whole range of plate thicknesses.

Ordering Information

Description	Part No
IMP Portable Cutting Machine-Single Blowpipe	
Comprises:-	
Tractor with 10m input cable, Hose set (blowpipe to valve block) blowpipe, Blowpipe holder and 342mm blowpipe bar, Radius bar and balance weight for circle cutting 75-1380mm diameter, Head nut spanner, Instruction manual	
IMP Machine Single B/pipe-NM 240V	0701254163
IMP Machine Single B/pipe-NM 110V	0401254164

IMP Portable Cutting Machine-Double Blowpipe
Comprises:-
 Tractor with 10m input cable, Double hose set (blowpipe to valve block), Two blowpipes, Two blowpipe holders, Two 525mm blowpipe bars, Radius bar and balance weight for circle Cutting 75-1740mm diameter, Headnut spanner, Instruction manual

IMP Machine Double B/pipe-NM 240V 0701254169

Options of 40V, 32V machines are available plus 24V DC for site work. (Both Single Blowpipe and Double Blowpipe versions.)

Optional Equipment

Interlocking extruded aluminium guide track 2m long including spring clip	0701254178
Track extension clips – Pack of 5	0701254179
