

Subject: MUREX Sabre-arc PT-81 (& PT-80) Air Plasma Torch

Number: 168

Date: 3rd March 2000

From: Group Service Manager

**Key Consumables for the
MUREX Sabre-arc PT-81 (& PT-80) Air Plasma Torch**

The new ESAB LPH50 & LPH80 air plasma cutters use the same plasma torch as that on the MUREX Sabre-arc 60i & 80i (& 50i) inverters. However the ESAB torch has been re-designated PT-27 rather than PT-81 to prevent confusion in other ESAB markets. The ESAB part numbers for certain consumable parts for the PT-27/81 are also different to those used by MUREX, see table below.

In order to rationalise stock we will shortly change to using the ESAB part numbers for these items. But, to make the transition easier, for an interim period we will dual label the packaging on these spares to show both ESAB and MUREX part numbers. Orders received under the MUREX part number will be automatically cross-written to the ESAB item.

PT-27/81 (& PT-80) Plasma Torch Spares

<u>Item</u>	<u>MUREX Pt. No.</u>	<u>ESAB Pt. No.</u>
Nozzle 30A	1415218	558 000 362
Nozzle 50A	1415211	558 000 363
Nozzle 80A	1415212	558 000 457
Electrode	1415214	558 000 364
Swirl Baffle	1415213	558 000 365

Please note and amend your records accordingly.
