

Subject: Recently introduced equipment
Number: 174
Date: 25th September 2000
From: Group Service Manager

As you are no doubt aware Murex Welding Products recently introduced the following into their Arc Equipment range:

Sabre-arc 25i/PT50
Transarc DC 201i
Transtig AC/DC 201i

Sabre-arc 25i/PT50:

Please find enclosed operating manual together with a separate set of service instructions.

Note: the PT50 torch is the torch that was used on the Sabre-arc 40i and still used on the 35i

Transarc DC 201i:

Single phase DC MMA power source, simple potentiometer controls.
Operating manual enclosed.

Transtig AC/DC 201i:

Single phase version of the Transtig AC/DC 203i, many parts are the same, the ones that are not are single phase variants ie. μ P control PCB, Tx/Rect PCB, primary inverter PCB. Operating manual enclosed.
